NATIONAL MPLADS PARLIAMENTARY AUDIT DOSSIER

Audit Cycle: FY 2023-26 • Ref: SETU-MINISTRY-2026

TOTAL SANCTIONED OUTLAY	PUBLIC CAPITAL AT RISK	CONCENTRATION INDEX (HHI)	CALIBRATED REAL RISK
Rs. 1943.43 Cr 5,000 Works Monitored	Rs. 292.51 Cr 906 Flagged (Operational)	622.5 Competitive Threshold < 1500	20.0 / 100 Mitigated (Raw: 24.7)

1. PARLIAMENTARY AUDIT & MACRO REVENUE INTELLIGENCE SYNTHESIS

Comprehensive national portfolio monitoring of 5,000 active MPLADS works representing Rs. 1943.43 Crores indicates a calibrated real-world risk score of 20.0 out of 100.0. Initial statistical screening flagged 906 works valued at Rs. 292.51 Crores for administrative review; however, field verification confirms that the observed allocation density is primarily driven by statutory mandates directing works to State Public Works Departments, Municipal Corporations, and Rural Development Departments rather than private contractor capture.

While the national portfolio risk profile remains low and classified as mitigated, audit telemetry identified isolated high-risk works scoring above 87.0 that lack operational delay factors, calamity moratoriums, or public line department justifications. These specific projects require central administrative intervention to verify physical asset creation against sanctioned outlays.

Real-World Operational Grounding & Hard-Negative Audit (HARD NEGATIVE MITIGATED):

The portfolio evaluation verdict is established as HARD_NEGATIVE_MITIGATED, supported by a low Herfindahl-Hirschman Index of 622.5. The concentration of works within State PWD, Nagar Nigams, and Rural Development Departments represents legitimate administrative routing to constitutional public bodies. However, unmitigated procurement anomalies persist in isolated projects with risk scores of 87.4 and 87.3, where zero operational, calamity, or statutory mitigating conditions exist, requiring targeted enforcement of the MPLADS Guidelines 2023 Revision.

- Empirical Audit Findings:
- Audit finding confirms that statutory agency allocation across State PWD, Municipal Corporations, and Rural Development Departments accounts for the majority of flagged items, successfully mitigating statistical concentration risk.
 - Disbursement log analysis identified specific high-risk works scoring 87.4 and 87.3 that lack any recorded calamity moratoriums, Model Code of Conduct freezes, or statutory execution mandates.
 - Measurement Book (MB) verification across sample sites indicates that public capital expenditure remains largely compliant with the durable asset creation mandates of the MPLADS Guidelines 2023 Revision.

2. MULTI-SIGNAL FORENSIC EVIDENCE TRIANGULATION

Every public work is evaluated against 7 independent, non-sequential anomaly models: **M1** Peer Cost Variance, **M2** Geospatial Clustering, **M3** Tender & GFR 155 Rules, **M4** Contractor Monopoly Capacity, **M5** Sub-Rs. 5L Structuring, **M6** Physical Milestone Gap, and **M7** Bipartite Entity Graph Conduits.

Statutory Alert Trigger: Signals exceeding the **60.0 Critical Floor** trigger mandatory administrative intervention warrants.

Evidentiary Confidence: Grounded in SHA-256 verified e-SAKSHI master logs with zero PII exposure.

PARLIAMENTARY PUBLIC ACCOUNTS COMMITTEE (PAC) AUDIT ACTION DIRECTIVES

[PAC REQUISITION]	Requisition a Comptroller and Auditor General (CAG) special verification team to conduct targeted physical inspections of all unmitigated works scoring above 87.0.
[SANCTION FREEZE]	Enforce a central disbursement freeze on subsequent fund releases for flagged works failing to submit verified Measurement Book (MB) records and Utilization Certificates (UC).
[CAG SPECIAL TEAM]	Issue a formal administrative requisition to State Nodal Authorities directing District Magistrates to impound project documentation for non-compliant works and submit detailed audit reports within 30 days.

PRIORITY NATIONAL AUDIT DOSSIER QUEUE (RAG-GROUNDED WORK LEVEL TRIANGULATION)

Work ID & Typology	Location & Implementing Agency	Public Outlay	Risk Audit	Operational Finding / Audit Note
MPLADS-001737 payment_progress_mismatch	Panna (Seat 313) (Madhya Pradesh) KAR-District-29 - Public Works Department (PWD)	Rs. 15,484,000	91.2 [Mitigated]	Implementing agency is State Public Works Department (Statutory Civil Engin...
